Dark Tobacco Markets To Open Nov. 28

Warehouses in the Dark-Fired Tobacco Belt will open Monday, Nov. 28, for the pre-Christmas selling of leaf. Warehouses in the 13-county belt are located in Bedford, Farmville, Blackstone and Lynchburg.

One veteran warehouseman noted this week that in his opinion, Appomattox County would have the top quality tobacco in the belt. In some sections of the belt, leaf was damaged during the frequent storms of the hurricane season. Some was so damaged in this county, but on an average, Appomattox is slated to have good quality dark-tobacco to place on the warehouse floors for the auction season.

After a pre-Christmas selling season, the markets will close for the holidays, and reopen in January.

The opening of the tobacco selling is traditionally a high mark of the farm year in the Virginia Dark-leaf belt. Although farmers do not look to tobacco as their one big cash income, as in past generations, yet tobacco forms a major portion of agricultural income in this area of Central Virginia.

Aid For Tree Planting Listed

Financial assistance is now available for rebuilding your forests. The 1956 Agricultural Conservation Program offers landowners of this area several Forest Establishment and Improvement practices in which Federal cost sharing can be obtained. This is an opportunity for owners of abandoned open land, heavily cutover land, or worthless brush for these practices were designed to assist landowners in the establishment of productive forests and the improvement of existing woodland.

The Forest Establishment practice covers the following operations:

1. Planting Tree Seedlings on Open Areas. This operation provides for a maximum Federal cost share of $1.28 per 100 seedlings planted.

2. Spot Planting tree seedlings in Existing Open Areas of Woodland. At least 400 well spaced seedlings must be planted on each acre. The maximum cost share for this operation is $0.60 per acre.

3. Spot Planting tree seedlings in areas of woodland and by the killing of undesirable trees in this area by poisoning, girdling, or lopping. A minimum of 400 planted seedlings per acre is required to qualify for the cost sharing of $16.00 per acre.

4. Strip planting brushland is a new practice designed to aid the landowners in planting brushland where heavy disc plows are used to prepare strips for planting at strip intervals of 6 to 16 feet apart. The maximum Federal cost share for this operation is $17.60 per acre.

5. Clearing, preparing and planting areas of brush land with desirable tree seedlings is an operation carrying a payment of $22.40 per acre. Technical assistance must be utilized to determine the suitability of the land for clearing and planting and for necessary measures to prevent erosion.

Two Forest Improvement Practices carrying a Federal cost share of $9.60 per acre are:

1. Thinning by eliminating undesirable trees, or the release of desirable seedlings by the elimination of undesirable species overtopping the seedlings.

2. The preparation of forest land for natural reseeding. This is accomplished by preparing a desirable seed by some method of scarification with a harrow, disc, or bulldozer on areas having adequate seed trees.

To be eligible for federal cost sharing for any of these forest practices, the area must be protected from fire and grazing. Fencing necessary to protect the woodland from any livestock likely to be pastured nearby carries a cost share of 27c per rod.

It was a gift from Mrs. Finly J. Shepperd, the former Helen Gould. Although the University holds the title of the Hall of Fame, Dr. Sockman explains that it is the trustee and its sacred obligation is to conserve the patriotic and educational aims of the founder and donor. The University keeps in mind that it is no local, but a national institution.

"It is a semi-circular open air colonade, ten feet, 3 inches wide and 630 feet long. The Hall of Fame is one of the last examples of architecture by Stanford White. Elections for the Hall of Fame are held every five years. All persons elected must have been a citizen and must have been dead 25 years.

"Three men were elected this year., out of 209. They were: Wilbur Wright, the co-inventor of the first successful man-carrying, powered airplane.- Mr. Wright was born on a farm in New Castle, Indiana. He received 86 votes.

The second was George Westinghouse, the inventor of air brakes and other mechanical and electrical devices. He was born in Central Bridge, N. Y. He received 62 votes.

Bronze likenesses of these three plus Woodrow Wilson and Joseph Willard will be placed in the colonade of the Hall of Fame, which will make 86 members in all.

A. H. S. Plays Title Game

Appomattox High School was in an "underdog role" as the Blue Hornets went up against the powerful Blackstone Rams in a Farmville last night, in a post-season football game for the unofficial Southside championship. A. H. S. won the District 4, Group 2 title, and Blackstone annexed the District 3 crown.

Blackstone had a record of 7 wins and one loss this season, losing 20-20 to Kenbridge for its only setback. The Rams won two other games in non-league play, for an over-all 9-1 record. The Blackstone team has been a high-scoring outfit, with an average of 7.8 yards rushing per try. Quarterback Ernest Robertson has completed 47 per cent of his forward pass attempts. Billy Abernathy, star halfback, has scored 127 points, and has averaged 12.4 points per game. Don Koonce, another halfback, is a hard-running ballcarrier and has averaged 7.1 yards each time he has carried the ball this season. Bobby Daniels, still another fine back, has averaged 7.59 yards per try. He has picked up 100 yards rushing in the last 3 games.

To match this powerhouse team, A. H. S. is weak on offensive power but hopes to throw up a sturdy defense to hold the score to a fair margin.

To compare with Blackstone's record of 9-1 for the season, A. H. S. came out 4-5-1, but won the league title with 3 trimphs in loop play.

Last year, A. H. S. was defeated by Emporia in a play-off for the Southside crown.
